

Pool Industry

Miller Weldmaster – Heat-Sealing Equipment For the Production of Pools

Miller Weldmaster manufactures a variety of equipment for the production of pools. Miller will design a machine to fit your specific inflatable production needs. Visit www.weldmaster.com and pick your industry for more pool production equipment, and watch videos of these systems.

The T-100 SR™ will produce the fastest seams in the industry!

T-100 Single Roller Arm™ For welding sidewalls to pool bottoms

The T-100 with a Single Roller Arm is used to put sidewalls to pool bottoms in conjunction with a rotating table or a hanging system.

Please visit www.weldmaster.com/pool/ to see these systems in production.

112 Extreme

112 Extreme™ For producing pool sidewalls and covers

The 112 Extreme is used to produce sidewalls and pool covers using the patent 112 traveling head.

Please visit www.weldmaster.com/112_extreme/ to see this system in production.

the 112 Extreme™ will produce the fastest seams in the industry!

116 Pool Beading For the manufacturing pool sidewalls

The 116 Pool Beading System is used to weld pool beading to the sidewalls of pools faster than any other option in the industry. The 116 PB can be easily set up to weld beading to the top or bottom of either side of the sidewall.

Please visit www.weldmaster.com/pool/ to see this system in production.

The 116 Pool Beading system is the fastest pool beading system on the market!
