

Inflatable Industry

Miller Weldmaster – Heat-Sealing Equipment For the Production of Inflatable Products

Miller Weldmaster manufactures a variety of equipment for the production of inflatable products. Miller will design a machine to fit your specific inflatable production needs. Visit www.weldmaster.com and pick your industry for more Inflatable production equipment, and watch videos of these systems.

T-300 Extreme Curve™

T-300 Extreme Curve™

For the Manufacturing of Inflatable products

The T-300 Extreme Curve™ combines versatility and precisely controlled operating parameters with an ergonomic design and interface for easy operation, speed, accuracy and productivity.

The T-300 Extreme Curve™ will easily allow you to seam curves and irregular shaped panels needed for producing inflatable products.

T-300 Extreme Curve™ Seal Types:

The T-300 Extreme Curve™ is designed to weld all the seams needed to produce your inflatable products!

T-500

T-500™ with Swing Arm

For the Manufacturing of Inflatable products

The T-500™ with swing arm will easily allow you to seam curves and irregular shaped panels needed for producing inflatable products. With its longer throat the T-500 will increase your production while decreasing fabric handling.

T-500™ Seal Types:

The T-500™ is designed to weld all the seams needed to produce your inflatable products!

T-100 Custom Inflatable

For the Manufacturing of Inflatable products

The T-100 Custom Inflatable will easily allow you to seam curves and irregular shaped panels needed for producing inflatable products. This custom machine is designed to weld an overlap seam with a cover strip on top and bottom of the seam to prevent water wicking.

T-100 Custom Inflatable Seal Types:

The T-100 Custom inflatable is designed to weld an overlap with cover strips on top and bottom!
