

Tarpaulin Industry

Miller Weldmaster – Heat-Sealing Equipment For the Production of Tarpaulins

Miller Weldmaster manufactures a variety of equipment for the production of tarpaulins / tarps, truck tarps, and covers. Miller will design a completely automated machine to fit your specific tarp production needs. **Visit www.weldmaster.com and pick your industry for more Tarpaulin production equipment, and watch videos of these systems.**

T-300 Extreme Flex™

T-300 Extreme Flex™

For the Manufacturing of Tarps & Covers

The T-300 Extreme Flex™ is designed to weld all the seams needed to produce your tarpaulins with the fastest technology on the market!

The T-300 Extreme Flex™ combines versatility and precisely controlled operating parameters with an ergonomic design and interface for easy operation, speed, accuracy and productivity.

The T-300 Extreme Flex™ will easily allow you to seam your panels together, hem the ends faster than any other technology on the market.

T-300 Extreme Flex™ Seal Types:

Pole Pocket

Rope and Hem

Overlap

Hem

112 Extreme™

Available from 3 to 20m long!

112 Extreme™

For the Manufacturing of Tarpaulins

The 112 Extreme™ is designed to weld long straight seams faster than any other technology in the industry!

The 112 Extreme™ is the next generation of the popular 112 Cross Seamer. The 112 Extreme™ is the fastest seaming technology in the industry, able to weld long straight seams up to 55 ft./min. (17 m/min.) The 112 Extreme™ is able to weld keder to tarp panels for the production of truck tarpaulins and is also equipped with a laser-guided cutter to cut the panels.

112 Extreme™ Seal Types:

Webbing

Pole Pocket

Rope and Hem

Overlap

Hem

T-500

T-500™

For the Manufacturing of Tarpaulins

The T-500™ is designed to weld all the seams needed to produce your tarps and covers!

The T-500™ will easily allow you to seam your panels together, hem the ends faster than any other technology on the market. With its longer throat the T-500 will increase your production while decreasing fabric handling.

T-500 Seal Types:

Pole Pocket

Rope and Hem

Overlap

Hem

Custom Equipment for High Production

M-100 Tarp Keder

Fully Automated Tarpaulin Manufacturing

The M-100 is a completely automated production process. This M-100 Tarp Keder pulls fabric off of two unwinds and welds an overlap while simultaneously creating and welding a two-sided keder to each edge of the finished panel. The M-100 is also able to cut your panels to specified lengths. The M-100 will greatly increase production while decreasing labor costs. **M-100 systems are specifically designed to fit your individual production needs.**

M-100 Tarp Keder is a completely automated tarpaulin production system.

M-100 Tarp Keder Seal Type:

M-100 Tarpaulin

Fully Automated Tarpaulin Manufacturing

The M-100 is a completely automated production process. This M-100 pulls fabric off of multiple rolls and welds up to 7 overlap seals and hems on both edges. This system also marks a perpendicular and lateral D-ring layout line and cuts to a desired length. The M-100 will greatly increase production while decreasing labor costs. **M-100 systems are specifically designed to fit your individual production needs.**

M-100 Tarp Keder is a completely automated tarpaulin production system.

M-100 Tarpaulin Seal Type:

112 Truck Side Production

Fully Automated Truck Tarpaulin Manufacturing

The 112 Indexing system is a completely automated production process. These fully automated systems are designed to dispense and weld webbing strips in pre-determined locations while indexing the panel to its next location.

112 Truck Side Production is a completely automated truck side tarp production system.

112 (indexing) Truck Side Seal Type:
